

bows on the little pdf

[ii] **سيه** is an Arabic word used to describe the rigid ends of a Middle Eastern composite bow. Usually siyahs had different cross-sections than the bending sections of the limbs. Unlike the ends of modern Korean bows there was little bending in a siyah.

Scythian Bows - ATARN

In music, a bow / *b* / is a tensioned stick with hair affixed to it that is moved across some part of a musical instrument to cause vibration, which the instrument emits as sound. The vast majority of bows are used with string instruments, such as the violin, although some bows are used with musical saws and other bowed idiophones

Bow (music) - Wikipedia

A composite bow is a traditional bow made from horn, wood, and sinew laminated together, cf. laminated bow. The horn is on the belly, facing the archer, and sinew on the outer side of a wooden core. When the bow is drawn, the sinew (stretched on the outside) and horn (compressed on the inside) store more energy than wood for the same length of bow.
