

### **sex roles and social pdf**

The distinction between sex and gender differentiates a person's biological sex (the anatomy of an individual's reproductive system, and secondary sex characteristics) from that person's gender, which can refer to either social roles based on the sex of the person (gender role) or personal identification of one's own gender based on an internal awareness (gender identity).

### **Sex and gender distinction - Wikipedia**

A gender role, also known as a sex role, is a social role encompassing a range of behaviors and attitudes that are generally considered acceptable, appropriate, or desirable for people based on their actual or perceived sex or sexuality. Gender roles are usually centered on conceptions of femininity and masculinity, although there are exceptions and variations.

### **Gender role - Wikipedia**

Gender refers to the socially constructed characteristics of women and men – such as norms, roles and relationships of and between groups of women and men. It varies from society to society and can be changed. While most people are born either male or female, they are taught appropriate norms and behaviours – including how they should interact with others of the same or opposite sex within ...

CH. 6 – SEXUALITY P. 148 113 As Millet somewhat simplistically reduced the relations of inequality between the sexes. 114 The feminist literature has been ambivalent about the myths of differences in sexuality. Sometimes they are rejected as false beliefs, sometimes they are accepted as a true but perverse condition resulting from male dominance, and sometimes they are portrayed as
